Message to the Contestants:

Congratulations on your participation in this national competition and reaching this milestone in your baking career.

The 2013 SkillsUSA Championships represent the culmination of more than 10,000 contests held at local, district and state levels across the country. The nation's top 3,900 vocational-technical students are competing in more than 68 occupational contests this week.

For Commercial Baking in 2012 we will hosted **58** students - **21** in the college division and **37** in the high school division. Like you, they are the local, regional or state baking contest champions. This provides you the rare privilege of testing your skill and knowledge with the best baking students in the United States. The real competition is with yourself - relax and do your best work. We know you are ready for the challenge.

The competition consists of two tests. The written test will evaluate your baking knowledge. Points are awarded based on the percentage of correct answers. The performance test will evaluate your baking skills. We will use eight judges, nearly all of whom are Certified Master Bakers (CMBs). There is more information about both tests in this package.

The Commercial Baking Competition is made possible by the generous donation of time, equipment, supplies and awards from more than 30 baking industry and educational sponsors - including Retail Bakers of America. The RBA, founded in 1918, represents 1,000 member companies who bring consumers quality bakery foods from bakery departments, independent bakeries, and foodservice facilities. In addition, RBA members include baking instructors, students, and suppliers of ingredients, equipment, and services

The Judges, members of the Education Committee and members of the Technical Committee have spent most of their lives in the baking industry. Our goal is to help you be successful and make this competition a positive experience so that you continue on as a successful baker. Regardless of what happens this week, you will leave Kansas City a changed person. You will be richer in experience and friendships. And, you will be better prepared for a bright future in retail baking.

Good luck to each of you.

Evaluating Products

There are five basic criteria used to judge products: external and internal appearance, taste, following directions and correct size. The product scoring sheets list the objective criteria associated with each. Judges are asked to pay close attention to proper proofing, proper bake, uniform/consistent shape and size, and specified finish weight (all are included in the five criteria) as they evaluate student's product.

Scratch Products

The "taste" criteria will be applied to the scratch bakery items only. This includes the bread, quick bread, cookies, and pie formulas. Some additional factors for these products are:

Breads: There should be consistent size and weight with slightly rounded ends. The exterior crust should have a uniform thickness and overall golden brown color. There should be no sharp or irregular corners and unusual shapes or streaks. Sidewalls should be firm, and crust neither thick or thin.

Cookies:

Should have excellent top crevices and evidence of proper mixing, even color and uniform shape and size.

Muffins:

Muffins should have good volume, nice top crevices and tops that are not blown out. They should have even rounded sides and a nice crown. The inside should have good even cell structure with no tunnels.

Frozen Dough Products: Sweet Dough and Puff Pastry

For the frozen dough items (sweet dough and puff pastry) we've eliminated the score for taste. We will be judging the products external appearance, the proper bake, the proper proof, creativity with the products made and if the basic instructions were followed. Other factors that will be considered are poor shapes, excessive flour dusting, unprepared fillings, over or under-baked and proofing the sweet dough properly. Even bake should be evident at the sides, center and where toppings meet the dough. The product should have an even gently rolling crown without indentations. The basic desired shape consists of symmetrical swirls to the center on uniform circular base. Good dispersion of cinnamon sugar, a light feel and even bake. For the coffee ring, Crust should have uniform thickness and be baked evenly. Excessive toppings may inhibit crust development.

2009 Commercial Baking Competition Tip Sheet

BEFORE YOU BEGIN...

READ all your formulas through. Points are deducted for not following directions

ORGANIZE your workstation. Keep your table neat and safe

ORGANIZE your time, you will need the entire time allowed to complete this competition

PLAN and this has several steps

- Don't assume or necessarily work in the same order as the formulas presented in the workbook
- For each product, estimate the time needed to scale, mix, rest, bake, cook and finish
- Put it all together what will you work on, in what order, at what time

Pay attention at Orientation – get a sense of where everything is located. Ask questions...that's the time to get your questions answered

ONCE YOU START....

MARK your product, sheet pans etc. everything that leaves your table, with your ID number

WRITE a note - use your timers - do whatever it takes to avoid these common mistakes –
Leaving products in the oven too long
Letting products over proof
Forgetting to display products

Watch your oven temperatures...make sure you are baking at the right temp

Check and double check your ingredients......Is it sugar OR is it salt?

CAKES are easier to decorate when they are frozen

Always CHECK and start mixers at what level? - #1

Make sure you **mark** your product to make sure no one takes your product. Do not take anyone else's product.
